Category	Tests	Description	Special Offer
Lung Examination	Pulmonary Function	Vital capacity and airway patency are evaluated in order to identify any abnormalities in lung function or lung diseases.	$280
	Chest X-ray, L Lat. View	Screening for lung conditions such as inflammation, fibrosis, pulmonary tuberculosis, tumors, and heart enlargement (cardiomegaly). @The price of this item will be updated to NT$368 starting January 1, 2027.	$288
Cardiovascular and Metabolic System	2-D ECHO of Heart	Evaluating the status of cardiac output and identifying structural abnormalities such as valve stenosis, prolapse, or insufficiency.	$2,800
	Extra-Cranial Carotid Dopplar Scan	Evaluating the carotid arteries supplying blood to the brain for sclerosis, stenosis, or other abnormalities. @The price of this item will be updated to NT$1,760 starting January 1, 2027.	$1,600
	24 Hrs Continuous ECG Scan	Obtaining and keeping ECG data for assessing heart disease.	$3,360
	Assessment of Atherosclerosis	Assessing the degree of systemic vascular sclerosis and obstruction using limb arterial pulse wave velocity.	$960
	Whole body fat, DXA method	Obtaining full-body scan with “Dual-energy X-ray Absorptiometry (DXA)” to explore fat distribution in the body. @The price of this item will be updated to NT$1,080 starting January 1, 2027.	$960
	Thyroid ECHO	Checks for inflammation, enlargement, and abnormal tumor images in the thyroid. @The price of this item will be updated to NT$1,280 starting January 1, 2027.	$1,200
	sdLDL	A key risk factor of atherosclerosis, plaque formation and cardiovascular diseases.	$1,200
	hs-CRP	Assesses the risk of cardiovascular disease.	$240
	Homocysteine	Assesses the risk of cardiovascular disease.	$640
	Pro BNP	An early marker of heart failure.	$1,440
	Hemoglobin A1c	Recent mean blood glucose levels provide insight into daily glycemic control status.	$240
	AC Insulin with HOMA-IR	Evaluates the quantity of insulin secreted as well as insulin resistance.	$320
	TSH	Evaluates for the presence of hyperthyroidism or hypothyroidism.	$360
	Free T4		$400
	Cortisol (requires check-in completed before 8:30 a.m.)	Reflects the balance of stress hormones in the body under stress.	$400
	DHEA-S		$400
Digestive System	Panendoscopy	Uses the NBI (Narrow Band Imaging) endoscopy and CO2 insufflation system to examine the esophagus, stomach, and duodenum for inflammation, ulcers, polyps, tumors, and other abnormalities.	$2,800
	Colonfibroscopy ※ Including low-residue meal	Uses the NBI (Narrow Band Imaging) endoscopy and CO2 insufflation system to examine the entire colon, sigmoid colon and rectum for polyps, tumors, hemorrhoids and other abnormalities. ※ Low-residue meal reduces the number of days of diet control before colonoscopy, greatly improving convenience in colonoscopy preparation.	$5,200
	Anesthesia	Administering intravenous anesthesia to reduce the discomfort during endoscopy - painless “gastroscopy” or “colonoscopy”.	(for any of the tests) $4000
		Administering intravenous anesthesia to reduce the discomfort during endoscopy - painless “gastroscopy” and “colonoscopy”.	(for both tests) $5800
	Upper Abdominal Sonography	Examination of the liver, gallbladder, pancreas, spleen, and kidneys for stones, tumors, cirrhosis, fatty liver, or structural abnormalities. @The price of this item will be updated to NT$1,280 starting January 1, 2027.	$1,200
	13C-urea breath test for H. pylori	Examines stomach for H. pylori infection.	$1,200
	Pepsinogen	Assessing markers related to chronic atrophic gastritis.	$960
	Anti-HCV	To determine the presence of hepatitis C infection and whether the individual is a carrier of the virus.	$360
	HBsAg	To determine the presence of hepatitis B infection and whether the individual is a carrier of the virus.	$240
	Anti-HBs	To check for immunity to hepatitis B.	$320
	Anti-HBc	Whether the individual has ever been infected with hepatitis B.	$320
	Anti HAV IgG	Checking for past infections of hepatitis A to determine the need for hepatitis A vaccination.	$280
	Helicobacter Pylori Ag	Helicobacter pylori is a significant risk factor for chronic gastritis, gastric ulcers and stomach cancer. Early screening to identify infection, followed by appropriate treatment, can help reduce ulcer recurrence and lower the risk of gastric cancer.	$400
	Liver fibrosis test ※Need to select together with Upper Abdominal Sonography (Hsinchu Center Exclusive)	Checking for liver disease risk, liver stiffness measurement can be used to assess the degree of liver fibrosis, serving as an important reference indicator.	$1,200
Kidney and Urology	Serum Electrolytes	Assesses the equilibrium of blood electrolytes (including sodium, potassium, chloride and calcium), indicating the functioning of the kidneys, endocrine system, and nutritional well-being.	$288
	Microalbumin Creatinine, U	Early screening for kidney function and glomerular disease, the collection of midstream morning urine for testing is required.	$632
Hematology	Blood Type + Rhesus Factor	Blood type and Rh factor testing.	$152
	Hb Electrophoresis	Screening for thalassemia.	$240
	Serum iron & TIBC	As a reference for anemia diagnostics.	$240
	Ferritin	As a reference for anemia diagnostics.	$320

Category	Tests	Description	Special Offer
Hematology	Lead	Tests for common heavy metals in the living environment.	$384
	As		$800
	Hg		$800
Tumor Biomarker	NSE	Reference indicators for small cell lung cancer.	$800
	CYFRA 21-1 (tumor biomarker)	Reference indicators for non-small cell lung cancer.	$800
	CA19-9 (tumor biomarker)	Reference indicators for pancreatic cancer and biliary cancer screening.	$480
	AFP	Reference indicators for liver cancer screening.	$320
	CEA	Reference indicators for colorectal and gastrointestinal cancer screening.	$480
	CA 72-4 (tumor biomarker)	Reference indicators for stomach cancer screening.	$800
	Prostate-specific antigen (PSA, males only)	Reference indicators for prostate disease screening.	$400
	Free prostate-specific antigen (Free PSA, males only)	Reference indicators for prostate disease screening.	$480
	Prostate Health Index (males only)	Reference indicator of prostate cancer risk, and it can also serve as an adjunct in biopsy evaluation when prostate-specific antigen (PSA) levels are elevated.	$2,000
	CA125 (tumor biomarker, females only)	Reference indicators for screening female reproductive cancers, such as ovarian cancer.	$480
	HE4 (tumor biomarker for ovarian cancer, females only) *Need to select together with CA125	Reference indicators for ovarian cancer screening.	$960
	CA153 (tumor biomarker, females only)	Reference indicators for breast cancer screening.	$480
	E-B VCA IgA Antibody	Screening for high-risk groups of nasopharyngeal carcinoma.	$400
Female medicine	Thin PREP Pap Smear	Computer ThinPrep pap test, which accurately screens for cervical cell abnormalities.	$1,200
	Human Papilloma Virus Test	As an assessment for cervical cancer risk by detecting human papilloma virus infection.	$1,760
	Gynecological ECHO	An examination for detecting any structural abnormality, such as tumor, in uterus and ovaries. @The price of this item will be updated to NT$880 starting January 1, 2027.	$800
	Anti-Mullerian Hormone	Ovarian function assessment.	$1,280
Female Breast Examination	Breast ECHO	Uses ultrasound to check for breast abnormalities, cysts and fibroma. @The price of this item will be updated to NT$1,760 starting January 1, 2027.	$1,600
	Mammography ※ Recommended for females who are 40 years of age or older.	Uses X-rays to screen for breast calcifications, tumors, and other conditions. @The price of this item will be updated to NT$1,760 starting January 1, 2027.	$1,600
	3D Mammography ※ Recommended for females who are 40 years of age or older.	Multiple breast X-rays processed and combined by computer for more definitive discrimination of true lesion, overlapping and asymmetry to improve accuracy.	$3,600
Male Medicine	Semen analysis ※Dunnan/Neihu Center: Samples should be delivered to Cathay General Hospital between 8:00 and 10:00 a.m., Monday through Friday. ※Hsinchu Center: Samples should be delivered to Cathay General Hospital between 2:00 and 3:00 p.m., Tuesday through Friday.	To determine the amount and motility of sperms.	$1,850
	Testosterone	An androgen utilized to evaluate male sexual function and prostate cancer treatment; in females, it detects the presence of polycystic ovaries.	$480
	Prostate Ultrasound (Dunnan Center Exclusive) ※Recommended for men over 50. Consultation available one day per month.	Assesses prostate for enlargement or tumors via invasive ultrasound.	$1,200
Neurology	Heart Rate Variability (Autonomic Function Test)	Detects any abnormality in the regulation of sympathetic and parasympathetic systems, explores the “age”, functional indicators and balance of autonomy system, and assesses your emotional state and stress index.	$1,120
Skeletal System	C-spine X-Ray: hyperflexion & hypertension	Examination for abnormalities such as cervical bone spurs, spondylolisthesis, and spinal stenosis.	$720
	KUB & LS Spine Lateral View	Detects any bowel obstruction, gallstones and urinary stones, evaluates diseases of the lumbar spine, pelvis, and hip joints.	$640
	Left Hip, BMD	DXA scanning of structures of special interest to examine for bone mass loss or osteoporosis.	(Single-site) $800
	Right Hip, BMD		(Dual-site) $1,440
	Lumbar Spine, BMD		(Triple-site) $2,000
	N-MID Osteocalcin	This most abundant non-collagen protein in bone matrix is associated with bone conversion, and may be used as an early assessment for osteoporosis.	$560
Rheumatology and Immunology	RA factor, quantitative	Rheumatoid arthritis factor evaluation.	$240
	ANA	Screening related to autoimmune conditions.	$400
	Total IgE	Evaluates for the presence of allergy.	$320

Category	Tests	Description	Special Offer
Infection	Anti-HIV	Preliminary screening for HIV infection. The price of this item will be updated to NT$560 starting January 1, 2027.	$320
	Serologic Test for Syphilis, STS	Preliminary screening for syphilis infection.	$80
	Varicella-zoster IgG	Checks for the presence of chickenpox antibodies to determine the need for vaccination.	$280
	Rubella IgG	To determine the presence of rubella antibodies and assess whether vaccination is needed.	$240
	Measles virus Ab IgG	Determines measles antibody status to assess the need for vaccination.	$192
	Widal & Weil-Felix Test (Blood)	An assessment for typhoid fever or other infectious disease.	$240
	Stool culture (including typhoid fever test)	An assessment for typhoid fever or other infectious disease.	$400
Eye Examination	OPH examination (Dunnan/Neihu Center Exclusive) (Consultation times are based on website availability; mydriatic administration required) 1. Slit lamp exam 2. Fundus test 3. IOP test	IOP test is an early screening of glaucoma; ophthalmologists examine the structures within the eye (including cornea, anterior chamber, pupils, crystalline lens, retina and optic nerve) with fundus test and slit lamp exam.	$720
	Optical Coherence Tomography	Provides cross-sectional or longitudinal 3D images of the macula, retina, optic nerve, and other parts of the eye.	$1,200
ENT Examination	Pure Tone Audiometry 500~8000Hz	Soundproof room audiometry (500~8000Hz).	$480
Nutrient & Mineral	Vitamin D	Evaluates for any deficiency of this fat-soluble vitamin that maintains the balance of calcium and phosphorus in the body.	$640
	Vitamin B12	Evaluates for any deficiency of this water-soluble vitamin, prolonged deficiency causes anemia and even irreversible central nervous system denaturation.	$480
	Vitamin A	Evaluates fat-soluble vitamins important for eye health to determine if there is a deficiency.	$800
	Vitamin E	Evaluates fat-soluble vitamins, which act as antioxidants to protect cell membranes and defend against free radical damage, to check for deficiencies.	$800
	Zinc	A nutritional trace mineral that activates antioxidant enzymes and is closely related to cell growth and metabolism.	$320
	Folic acid	Evaluates for any deficiency of this water-soluble vitamin, prolonged deficiency causes anemia; it's usually tested with vitamin B12.	$480
	CoQ10	A nutrient providing cells with energy and anti-aging benefits.	$640
Function Medicine	Cardiovascular Risk Factors Analysis (Dunnan/Neihu Center Exclusive)	Gaining a deep understanding of various indicators related to cardiovascular and metabolic syndromes, including lipid metabolism, vascular integrity, chronic inflammatory factors, oxidative stress, and blood sugar metabolism, provides a comprehensive evaluation of cardiovascular health and metabolic syndrome.	$5,500
	Essential Vitamins And Minerals Analysis (Dunnan/Neihu Center Exclusive)	Assesses antioxidant vitamins, bone-supporting nutrients, and minerals needed for blood formation; can be strengthened through diet, exercise, and supplements to support heart, bone, and blood health.	$6,000
	Stress Hormone Analysis (Dunnan/Neihu Center Exclusive)	Measure the concentration of adrenal hormones related to stress and their metabolites. Assess the body's stress levels and identify risk factors for chronic fatigue, hypertension, and immune disorders.	$6,500
Genetic Testing	Common Cancer Genetic Testing (Male / Female)	Assessing the genetic risks of nine common cancers, including colorectal cancer, liver cancer, lung cancer, esophageal cancer, gastric cancer, pancreatic cancer, thyroid cancer, and for males: prostate cancer, nasopharyngeal cancer; for females: breast cancer, ovarian cancer.	(One option) $8,000 (Two options) $12,000 (Three options) $16,000
	Metabolism Genetic Testing	Assessing the genetic risks of stroke (including NOTCH3), atherosclerosis, essential hypertension, coronary artery calcification, type 2 diabetes mellitus, and hereditary hyperlipidemia.	
	Degradation Genetic Testing	Assessing the genetic risks of early-onset Alzheimer's disease, late-onset Alzheimer's disease, dementia with Lewy body, and Parkinson's disease.	
SET	Digestive tract set 2.0	Including AI-powered colon polyps detection system and painless NBI gastroenteroscopy (meal replacement included), bowel probiotic test, amylase test.	$17,000
	Cardiovascular set	Including 24-hour ECG test, echocardiogram, transcranial Doppler scan - carotid, lipoprotein (a) test, high sensitivity C-reactive protein test, homocysteine test, electrolyte test (sodium, potassium, chloride, calcium); and one of the following two options: nutritional consultation and HRV (an autonomous nervous system test).	$10,500
	Lungs set	Including lungs computer tomography, pulmonary function test, neuron-specific enolase.	$7,500

Category	Tests	Description	Special Offer
Medical Imaging ※ The imaging tests are performed at our partner hospitals' facilities	Low Dose Lung CT	A great tool for early lung cancer screening! It can precisely identify the presence of tumors, pneumonia, granulomas, or fibrosis in the lungs.	$6,500
	Coronary Artery Calcium Scoring	Checks the degree of coronary artery calcification to assess the risk of myocardial infarction.	$6,500
	640-Slice: Cardiac 3D CTA ※ Administration of contrast agent is required	A non-invasive method to clearly present the coronary artery branches in 3D, which assesses the heart and coronary arteries for sclerosis, stenosis, or obstruction.	$25,000
	Specific-site MRI	Examines a single site for tumors, inflammation, injuries, and degenerative changes (site choices include brain, neck, upper abdomen, pelvic cavity, lumbar-sacral spine).	$10,000
	Whole Spine MRI	For the assessment of spinal stenosis, bone spurs, intervertebral disc (IVD) protrusion, spondylolisthesis, and spinal tumor screening.	$19,800
	Head MRI and Brain & Neck MRA ※ Administration of contrast agent is required	Evaluate for cerebral vascular narrowing, sclerosis, obstruction, cerebral vascular abnormalities, tumors, haemangioma, cerebral atrophy, and cerebral parenchymal changes.	$22,000
	Whole Body MRI+Low Dose Lung CT	Examines the entire body (brain, neck, lungs, upper abdomen, pelvic cavity, and entire spine) for tumors, or inflammatory, damages, degenerative, or other changes.	$42,000
	Whole Body MRI+Brain & Neck MRA+Low Dose Lung CT ※ Administration of contrast agent is required	Examines the entire body (brain, neck, lungs, upper abdomen, pelvic cavity, and entire spine) for tumors, spinal degeneration, cerebrovascular abnormalities, and brain parenchymal changes.	$48,000
	Whole Body PET/CT (Dunnan/Neihu Center Exclusive) ※ Administration of radioactive contrast agent is required	Screens the entire body for cancer, assesses cancer staging, and monitors treatment.	$33,000

Note:
(1) Other than semen analysis, which is performed at Cathay General Hospital, all other examinations are conducted at Dunpin Clinic and Fulin Clinic(Dunnan Center), Ruicheng Clinic, Ruijian Clinic and Ruihung Clinic(Neihu Center), Min'an Clinic and Tai'an Clinic(Hsinchu Center).
These clinics reserve the right to modify the scope, items and prices of examinations. Please refer to the latest announcements for updates.
(2) In accordance with medical regulations, medical imaging examinations are performed at our partner hospitals' facilities.
(3) None of the test items in the sets is replaceable or refundable.

Set Name	Test items	Description	Price
【New】 Allergy test (spices and condiments)	Tarragon, marjoram, thyme, basil, ginger, anise (star anise), garlic, coriander (cilantro), black pepper, gum arabic	Usually as condiments or essence oil, especially seasonal or foreign cuisine. For adults of all ages, especially those with wider dietary diversity or eating out.	$1,280
Allergy test (nuts and snacks)	Pecan, cashews, pistachio, walnut, peas, peanuts, soybean, almonds, gluten, sesame	Nuts that are usually seen in Western-style confections, and gluten commonly seen in Western-style cuisine and flour-based foods.For people of all ages, especially those with wider dietary diversity.	$1,280
Allergy test (fruits)	Orange, apple, banana, peach, strawberry, pear, lemon, pineapple, mango, grapes	Including the common fruit species in Taiwan that can induce allergy, it is important to avoid juice, confections and dried goods of the fruits causing allergy. For people of all ages who are fruit lovers or allergic to pollen.	$1,280

2027 Dunnan/Neihu/Hsinchu Center【Optional Tests】 Information

Cathay Health Management
02)412-8006

Set Name	Test items	Description	Price
Allergy test (vegetables)	Peas, white beans, carrot, potato, tomato, spinach, cabbage, bell pepper, celery, cucumber	Including the common vegetable species in Taiwan that can induce allergy, it is important to avoid the products of the vegetables causing allergy. For people of all ages who are root/tuber vegetable lovers.	$1,280
Allergy test (24 items)	1. Microbes: Penicillium, Cladosporium herbarum, Aspergillus, Candida albicans, Alternaria alternata, Helminthosporium; 2. Pet dandruff: Cat and dog dandruff; 3. Rodents: Guinea pig, rat, mouse dandruff; 4. House dust: Dermatophagoides pteronyssinus, Dermatophagoides farinae, Blattella germanica, house dust; 5. Foods: Cod, salmon, common mussel, shrimp/prawn, egg white, milk, peanuts, mustard	Includes the common allergens exposed through contact or inhalation, or foodstuff consumed often or with the tendency to cause allergies. For people of all ages to determine their own allergies.	$2,560
【New】 Allergy test (inhalable allergens, 41 items)	1. Microbes: Penicillium spp., Cladosporium herbarum, Aspergillus spp., Candida albicans, Alternaria alternata, Helminthosporium spp; 2. Pet dandruff: Cat and dog dandruff; 3. Rodents: Guinea pig, rat, mouse dandruff; 4. House dust: Dermatophagoides pteronyssinus, Dermatophagoides farinae, Blattella germanica, house dust; 5. Avian feathers: feathers of goose, chicken, duck, turkey; 6. Occupational: Latex 7: Grass pollen: Bermudagrass, perennial ryegrass, bahia grass, common ragweed, pigweed, plantain 8. Pollen from wild-grown trees in the mountains: ash leaf maple, white oak, birch, American beech, Claro walnut 9. Pollen from common street trees: Olive tree, goat willow, lacebark pine, Eucalyptus spp., Formosa acacia, Melaleuca spp 10. Herbs and flowers: Mugwort, oxeye daisy, dandelion, goldenrod	To determine the common but overlooked allergens in daily life. For: 1. Adults and children with suspected airway hypersensitivity (i.e. rhinitis, asthma). 2. People requiring frequent outbound or inbound travel, for example, those living in another country or traveling inbound and outbound often. 3. Those engaging in regular outdoor activity, for example, hikers, golf enthusiasts.	$4,240
Allergy test (49 food items)	1. Staple foods: Wheat, rye, barley, rice, oats, maize, buckwheat 2. Eggs and meat: Egg white, milk, pork, beef, egg yolk, chicken, turkey 3. Seafoods: Cod, salmon, tuna, common mussel, shrimp/prawn, crab, lobster 4. Fruits: Mango, kiwi fruit, banana, melon, peach, strawberry, pear, lemon, pineapple 5. Nuts: Peanuts, pecan, cashews, pistachio, walnut, sesame 6. Vegetables: Tomato, spinach, cabbage, bell pepper, mustard, peas, white beans, carrot, potato 7. Condiments: Tarragon, marjoram, thyme, anise (star anise)	These food choices for allergen testing are selected from seven food categories, and focused on foodstuff favored by Taiwanese population or common allergens. For: 1. Children and adults of all ages, especially those with wider dietary diversity and eating out. 2. People favoring grains, nuts and snacks.	$5,040
【New】 Allergy test (64 food items)	1. Staple foods: Wheat, rye, barley, rice, oats, maize, buckwheat 2. Eggs and meat: Egg white, milk, pork, beef, egg yolk, chicken, turkey 3. Seafoods: Cod, salmon, tuna, common mussel, shrimp/prawn, crab, lobster 4. Fruits: Mango, kiwi fruit, banana, melon, peach, strawberry, pear, lemon, pineapple, orange, apple, grapes 5. Nuts: Peanuts, pecan, cashews, pistachio, walnut, sesame, soybean, almonds, gluten 6. Vegetables: Tomato, spinach, cabbage, bell pepper, mustard, peas, white beans, carrot, potato 7. Condiments: Tarragon, marjoram, thyme, anise (star anise), basil, ginger, garlic, coriander (cilantro), black pepper, gum arabic	These food choices for allergen testing are selected from seven food categories, and focused on foodstuff favored by Taiwanese population or common allergens. For: 1. Children and adults of all ages, especially those with wider dietary diversity and eating out. 2. People favoring grains, nuts and snacks.	$7,200
